

Construction Management

MCFA has been providing construction management services to public and private clients worldwide since 2003. Our **talented team of construction management experts** have supported projects in the Federal Government and Department of Defense as well as Infrastructure, Industrial, Health Care, Senior Living and Residential markets. They bring the **expertise and experience** to serve the most diverse needs of clients and project types.

From concept to completion, planning to punch list, our team partners with our clients to drive projects towards success. Our people are the difference. We believe that Construction Management is more than managing safety, budget, specifications and schedules. It's about **servicing clients and their missions**. It's about navigating and coordinating teams and contractors. In short, it's about solving problems. This is **The MCFA Difference**.
