

# CONSTRUCTION MANAGEMENT SUPPORT AT NAVY YARD

## PROBLEM

- Aging infrastructure throughout the Navy campus in Philadelphia Navy Yard.
- Insufficient electrical load capacity to support the Navy's projects and future development opportunities.
- The original project team required additional assistance to complete project.

## SOLUTION

- MCFA delivered construction management support for Burn's Engineering Group.
- Our team of CM experts assisted with quality assurance support and weekly progress reports.
- MCFA responded quickly and efficiently to issues that arose during the construction and development of project scope items.

## RESULTS

- MCFA delivered the best possible project outcome to the Navy and PIDC on time and on budget.
- The additional electrical load capacity will support the Navy Yard's expansion for the next 5 years.
- MCFA was recognized as being a deeply integral part of the project team's success.
